

## ONE DAY NATIONAL SEMINAR

ON

## SAFETY PROTOCOLS FOR SUGAR AND ALLIED INDUSTRY

at

NATIONAL SUGAR INSTITUTE, KANPUR

March 21, 2025

10:30 Hours (IST) Onwards

The seminar is aimed at discussing various safety measures which are required to be taken in a sugar factory keeping in view the processing conditions. A sugar factory employs many unit operations from sugarcane handling to sugar production which also include generation of power and its export. To avoid accidents and incidents in the industry, employees must be aware of industrial safety principles and danger areas. To achieve safety standards, all industrial employees must be trained specifically and have full safety knowledge.

Safety is the first requirement, and every industrial employee must learn safety measures even before starting to work on a machine. Industrial and occupational health safety are both important for the healthy workings of any industry.

Some mishaps which occurred in some of the sugar factories have made this issue all the more important for discussion and implementation.

During the seminar, presentations will be made by eminent experts from various reputed organizations on subject matter.
