Sugar Industry – Potential For Providing

bioenergy & OXYGEN

The webinar is proposed to be convened with the above theme under the auspices of "Aazadi Ka Amrut Mahotsav" on the eve of 75th year of independence of India. Apart from potential, significant impact on climate change mitigation, energy security and sustainability of the sector are other various important factors associated with the energy obtainable from sugarcane in sugar and allied industries. Utilizing every bit of sugarcane plant for conservation of energy and enhanced energy efficiency can make the sugar industry an energy hub. In wake of covid-19 pandemic and rising demands for oxygen, apart from discussions on measures to produce bioenergy, presentation shall also be made on production of O₂ under the existing infrastructure of sugar factories.
