International Webinar  
on

## SUGAR & SWEETENERS - QUALITY AND CONSUMPTION PATTERNS

**Assiut University, Egypt**

**National Sugar Institute, India**

**National Sugar Development Council, Nigeria**

**National Sugar Development Council,  
Nigeria**

Diabetes and epidemic obesity continue to influence dietary lifestyles of consumers across the globe as they witness transitions in the quality of food being served to them. Apart from sugar, sugar substitutes such as non-nutritional artificial sweeteners, low calorie or zero calorie natural sweeteners that include sugar alcohols and plant derived non-saccharide sweeteners find their application in foods and beverages industry. There is a need to further explore the available technologies for the development of alternative sweeteners, which would function in line with the safety and health of consumers and also for food and beverage industries to get better market and price. The webinar gives an insight about all such possibilities that would pave way for future innovations in the field of sweeteners and also aiming towards value addition along with giving due diligence to sugar production and the consumption scenario in light of Covid-19 implications. The international experts shall also discuss on use of other feedstock viz. sugar beet for production of such sweeteners.
